

Press Release: Local Newspaper and Radio Stations

The Associated Landlords of the Cumberland Area (ALOC) and National Tenant Network (NTN) are pleased to announce a new partnership that will provide ALOC members with the comprehensive tenant screening services of a national tenant screening company.

National Tenant Network is a national tenant screening and performance reporting agency that provides the most comprehensive tenant profiles in the industry. Chosen by the nation's top property management companies including the U.S. Department of Housing and Urban Development (HUD), NTN has proven itself as a leader in the tenant screening industry.

NTN is a valuable resource for small rental property owners to the professional fee based management companies because it allows them to avoid applicants who have proven themselves to be problem residents for previous landlords. NTN provides a unique forum where members can report and share their experiences about good and bad residents with landlords across town and across the country! Tenant histories, retail credit, nationwide sex offender and criminal background searches are just a few of the reports available. All NTN reports and forms are Federal Fair Housing and FACT Act compliant.

For over 25 years, NTN has proven itself the industry leader at providing proven tenant screening products that truly work to allow rental property owners to avoid renting to other landlord's problem tenants. NTN offers their reporting services via phone, fax and the internet at www.ntnonline.com.
